Education

Techno College Of Engineering Agartala

July 2023

Bachelor of Technology in Computer Science & Engineering (SGPA: 8.55 / 10)

Agartala, Tripura

- **Relevant Coursework:** Data Structures and Algorithms (C++), Digital Logic & Microprocessor, Discrete Mathematics, Computer Organization & Architecture, Computer Networks, Database Management Systems, Compiler Design.

Experience

Strategic Research Insights LLP

August 2023 – May 2026

Analyst (Programming & Quality Control)

Hyderabad, Telangana

- Programmed complex market research surveys and engineered structured data collection pipelines utilizing Sawtooth Lighthouse Studio, JavaScript, and Perl.
- Engineered R&D integrations leveraging Computer Vision data to generate eye-tracking heatmaps for behavioral analysis, alongside building automated survey-to-Dropbox pipelines via JavaScript.
- Co-developed an NLP-driven AI chatbot leveraging OpenAI's ChatGPT model to dynamically generate and serve context-aware questions to survey respondents.
- Mentored and trained 2 junior analysts in programming best practices and predictive data analysis methodologies utilizing IBM SPSS.

Projects

Fresh Fruit Detection (B.Tech Project) | Python, OpenCV, YOLOv3, JavaScript

- Engineered a real-time computer vision pipeline utilizing a custom-trained YOLOv3 model and Kaggle datasets to classify fruits as fresh or rotten. Integrated a JavaScript frontend with a Python backend to perform dynamic object detection and render probabilistic freshness scores on live video streams.

NothingLand | Java, JavaScript, Android SDK

- Engineered an open-source Android utility replicating the "iOS Dynamic Island" interface in Java, successfully deploying beta releases and gaining over 80 GitHub stars.

Automated Linux Workspace Environment | Python, Shell, Vim Script, Lua

- Programmed a robust, reproducible Linux development environment utilizing Python and Shell scripting to automate system configurations, garnering over 100 stars on GitHub from the open-source community for its stability and versatile deployment.

WSL USB Passthrough Utility | C#, WSL

- Engineered a utility in C# to automate the passthrough and mounting of physical USB devices from Windows host systems into Windows Subsystem for Linux (WSL) environments.

Technical Skills

Languages: Python, Java, C/C++, C#, JavaScript, Shell, Lua, Assembly, XML, HTML/CSS.

AI & Frameworks: PyTorch, OpenCV, YOLOv3, OpenAI API, Android SDK, Node.js.

Tools & Platforms: Linux, CMake, GCC, Sawtooth Lighthouse Studio, Git, Vim.

Core Concepts: Computer Vision, Machine Learning, Operating Systems, System Automation, Algorithms, Embedded Systems.

Achievements

- Achieved top 20 rank on Hackathon 2020 organized by Future-Proof Labs by Techno India Group.

Leadership & Open Source Contributions

Official Maintainer: Custom Android OS projects including DotOS, SuperiorOS, and ViperOS.

Student Member: Future-Proof LABS (Technical Society of Techno India Group).

Competitor: Robotronics Inter-College Robotics Competition.
